- Comes in multiple pieces

Assembled Dimensions: 10' 11" x 18' 11"

Kids will really feel like they are racing on the Talladega Fast Track Pedal Path. This flat surface allows them to pedal away without worrying about cracks or holes in the ground. The path is also great for separating the tricycle area from the rest of the playground, increasing safety for all those involved. Combine the pedal path with a variety of accessories, like street signs or gas stations, to create a one of a kind play area for tricycles. The Talladega Fast Track Pedal Path is available with or without road stripes. It also features a special section that allows trikes to easily enter and exit the pedal path. Easy to install, the pedal path is ready for play in no time at all. Providing a safe place for tricycles on the playground allows kids to work on coordination and building strength. Children will also love building social skills and confidence as they master the tricycle.
