COMPLIES With:

ASTM F1487-17

CPSC PUB #325

ADA Compliant

Shrink the space needed for a play structure without skimping on the fun with the Rock River Play System. School-aged children will find navigating around the unit a breeze and almost natural. An Overhead Straight Snake Loop Ladder has slithered across the expansive sky creating a core-focused exercise disguised as a game. Once children land after completing the climber, they can take a hop down the Pebble Steps or venture higher to the Double Wave Slide above. Others might opt for immediate sliding satisfaction by using the Pod Climber to reach the 4-foot deck that holds the slide. Some might be sidetracked from their original path by the Maze Panel whose beautiful flower like image can be traced repeatedly. Once back on the ground level, the Rain Wheel and Bench Panel are available for play. The best part of this system is that it is kept in Primary and Neutral color palettes in-stock allowing it to be shipped out in a week or two. There is always the option to order it a set of our custom colors with a six to seven week shipping time. No matter the colors, this structure is sure to bring the color of fun to your playground.
