

## Hanging Cantilever Bleacher Shade

**Price \$5,943.00**

### Highlights:

- Provides protection from the elements
- Fits nicely over the bleachers
- Variety of sizes and features to fit your specific needs
- Allows spectators to comfortably view activities

---

The Hanging Cantilever Bleacher Shade features a traditional cantilever design meant to minimize the required mounting points in-ground, while maximizing the shade coverage area. Simply put, the design requires only two upright posts. This means visibility will not be impacted, a requirement for proper viewing at sporting and outdoor events. The shade structure is available with or without glide elbows, a device meant to ease the difficulty of removing the canopy for seasonal or inclement weather events. Choose from a variety of sizes that accommodate several sizes of bleachers. All shade is designed for in-ground mount but is available with surface mount options. Contact a AAA State of Play specialist to learn about custom shade solutions for non-standard sizes. AAA State of Play offers custom bleacher shade renderings upon request at no additional charge.
