The Royal Double Hamstring Stretch is a necessity in your healthy conquest. Hamstrings are one of the most commonly torn muscles when working out too much. An easy way to prevent injuries is to stretch out the hamstrings before and after a workout, but many people overlook stretching altogether. That is why this station is such a winner to add to your outdoor fitness area. Having this as a part of your outdoor fitness area will encourage your patrons to actually stretch out their hamstrings, preventing injuries, and ensuring that they spend more time working out on your other equipment. The frame is made out of a powder-coat painted steel post that keeps rust at bay. The Royal Fit Rider Station provides a leg building exercise that pairs well with this stretching station. The Royal Double Hamstring Stretch is made out of commercial grade material that will endure natural hardships. Your patrons will never skip on stretching with this unit.
