CPSC PUB #325

Let the chin lead the way to more toned muscles with the Triple Chin-Up Bars. These bars are great for communities with people who want to work on strengthening their back and arm muscles. Up to three people can use this fitness equipment at a time. If patrons require a smaller unit that accompanies two exercisers, the Royal Chin Up is more their style. As individuals do chin-ups, they will be working numerous muscles including their biceps brachii, latissimus dorsi, and teres major muscles. These muscles are important in the movement of the arm, as well as everyday activities such as lifting heavy objects. The Triple Chin-up Bars are functional in their ability to improve health but also in their ability to withstand mother nature's elements. From scorching sunlight to frigid wintry nights, this unit will stand strong.
