Exercisers will be able to lift themselves off to a new body by using the Single Vertical Ladder. This piece of fitness equipment not only lets you climb up and down to work on leg muscles and balance, but the rungs can be used in a variety of arm and core exercises. The Single Vertical Ladder is made with steel painted in a rust resistant, powder-coat paint; making it an ideal addition to any outdoor space. This unit, being more weight and strength focused, is complemented by a more cardio driven station like the Single Sky Walker and the Single Country Skier. Any pieces can be ordered in your choice of custom color combinations of two colors allowing for a clean, sleek, sophisticated look. An all-around great workout unit, the Single Vertical Ladder is designed to make exercising convenient and enjoyable.
