COMPLIES With:

ASTM F1487-17

CPSC PUB #325

The Triple Royal Rower will be the crowning jewel of your outdoor fitness area. It gives individuals young and old a chance to improve their cardiopulmonary function by strengthening their heart and lungs. This piece of fitness equipment also works the entire body, focusing primarily on building up the waist and back, as well as arm muscles. It is also a great way to quickly burn calories and improve endurance. This unit's design is built for a comfortable seat during a workout. The seat, topper, and feet are made of durable rotationally-molded plastic. The plastic comes in gray with your choice of two of our custom powder coat paint colors. The Triple Royal Rower has three different areas to workout. Individuals can pick their favorite or exercise with two more people. For a less crowded venue, the Single Rower Machine provides a more solitary experience.
