CPSC PUB #325

Bring two friends and workout together on the Triple Royal Dip Bars. Exercising with someone else has been proven to increase times and motivation. The Royal Dip Station is an alternate product for two users if three is a crowd. These pieces of fitness equipment also provide a simple and easy way to strengthen your upper body. Dipping exercises specifically work muscles such as the triceps, the sides of the chest, and the back. This unit can also be used to tighten core muscles and define users' abdominals. Users just lift their legs and hold them parallel to the ground. Any confusion on their use is mitigated with the inclusion of the instructional guide printed on the backboard. This unit's composition is designed to withstand varying climates, temperatures, and moisture; making this an ideal outdoor piece of equipment.
