Footprint: 3' 5" x 9' 9"

Use Zone: 22' 6" x 15' 3"

COMPLIES With:

ASTM F1487-17

CPSC PUB #325

This one panel rope challenger freestanding climber is great for school age children to work on their climbing and balance at the same time, and in many ways. The net is an easy climb for any age while the panel provides more of a challenge for children who need one. Children can imagine they are climbing the inside of a cave or to the top of a mountain, and the seven foot height may make them feel that way. The net is wide enough for multiple children to play on it, making this an independent piece for multiple children. The plastic is rotationally molded, providing high quality grips, and the netting is a nylon-wrapped steel cord, providing great strength and integrity to the climber. The grips, which are injection molded, and panel can be ordered in many different colors. AAA State of Play also has installment options available if that is needed.
