### COMPLIES With:

ASTM F1487-17

CPSC PUB #325

The two panel rope challenger freestanding climber is great for a larger number of children to test their climbing skills. It features two nets and two panels, meaning children can take themselves on a journey from one side of the piece to the other, or just use the pieces they want. The panels, which are made from a rotation mold, and the grips, which are injection molded, make for a different climbing experience and test children by also challenging their balance. The net, which is metal wrapped in durable nylon, provides an easier climbing experience for children as well. Both the grips and panels are available in a variety of colors to match any playground. At seven feet high, the equipment is great for any school age children and will provide years of enjoyment. Don't forget to use an adequate safety carpet when installing equipment. Installation services are available for all equipment.
