Footprint: 10' 1" x 10' 1"

Use Zone: 20' 3" x 20' 3"

COMPLIES With:

ASTM F1487-17

CPSC PUB #325

The Freestanding 270-Degree Rung Standard Horizontal Ladder is one of our more unique models of overhead climbers and has some significant advantages over classic climbers. The rounded shape makes it much more compact, enabling a long stretch of overhead ladder to fit into a smaller space. This climber is perfect for playgrounds looking for the right piece of equipment to fill a small open space which would be too small to safely contain a larger structure. The shape also means that a child's field of vision will shift with each new rung that they move to, giving them a full view of the surrounding playground from a slightly elevated vantage point without them having to try to look around while they climb. And since the start and end of the climber are in the same spot, a child can use the Freestanding 270-Degree Rung Standard Horizontal Ladder again and again uninterrupted if no one else is waiting to get on.
