- Wide array of color choices for the powder-coat painted steel

Age Group: 5 to 12 years

Footprint: 8' 5" x 8' 5"

Use Zone: 20' 3" x 20' 3"

COMPLIES With:

ASTM F1487-17

CPSC PUB #325

The Freestanding 90-Degree Snake Ladder is an overhead climber that combines popular features from several of our other models. Most noticeably the overhead bar curves at two 45 degree angles, which seems like a minor change but adds a significant increase in difficulty, variability and excitement. To avoid any loss of structural integrity from this change we've added an extra support bar to the middle of the structure; ensuring its stability without getting in the way of a child crossing the bars. The snake-styled rungs, which feature a single rung which bends back and forth across the overhead beam, encourages kids to alternate reaching between their right and left hands. They also have the ability to hold onto the outside edge of each bend if they so choose. It also adds to the visual appeal of the structure, making it an interesting piece of playground equipment which is sure to stand out.
