

## Freestanding Double Swinging Ring Ladder

**MSRP \$5,036.00**

**SALE \$3,874.00**

### Highlights:

- Great way to test arm strength
- Excellent for schools and churches
- Two overhead ladders with 14 rings in total
- Steel frame is painted with a powder coating

**Age Group:** 5 to 12 years

**Footprint:** 4' 2" x 8'

**Use Zone:** 20' 0" x 16' 2"

### COMPLIES With:

ASTM F1487-17

CPSC PUB #325

The Freestanding Double Swinging Ring Ladder is an excellent piece of playground equipment which offers a simple way to help younger elementary schoolers build core and arm strength. The dual rails of hanging rings provide double the support between hand motions giving children greater security. With fourteen ring grips, this design offers kids a large range of motion. Rather than having to swing to the ring in front of them, they have the option of swinging from one side to the other or alternating back and forth with one hand on each side. The hanging rings are able to move in any direction, which makes them perfect for swinging wherever the child wants to go. Kids who can't fit both hands into one ring are now able to hang from two side-by-side rings at once without having to reach ahead. The powder coat painted steel composition of the structure is strong enough to easily support multiple children at once, who can pass each other by sticking to opposite sides.
