COMPLIES With:

ASTM F1487-17

CPSC PUB #325

The Freestanding Quintuple Straight Swinging Ring Ladder is one of our most exciting overhead climbers. This high quality piece features five rows of freely hanging rings - thirty five rings in total. These rings offer a full 360-degree range of motion, which the Freestanding Quintuple Straight Swinging Ring Ladder utilizes allowing multi-directional climbing. There is no designated entrance or exit because this structure encourages kids to move as they choose, rather than just going from Point A to Point B. They can maneuver all around the structure without ever touching the ground for as long as they're able to hold on, making this a perfect way to build upper body strength. The structure is big and stable enough to easily accommodate several kids at once without any problems. This unit also comes equipped with all the standard features of our other overhead climbers, including thick steel support posts, a highly resistant coat of powder-based paint and able to be color customized.
