- Powder-coat paint can withstand harsh weather

**Age Group:** 5 to 12 years

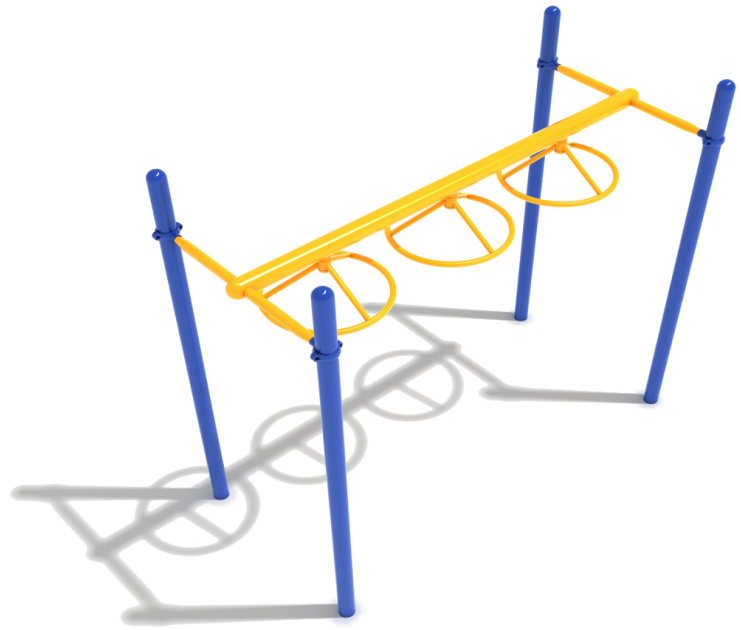

**Footprint:** 4' 2" x 8'

**Use Zone:** 20' 1" x 16' 3"

### COMPLIES With:

ASTM F1487-17

CPSC PUB #325

The Freestanding 3-Wheel Overhead Swing Ladder is an innovative piece of playground equipment that challenges both upper body strength and hand-eye coordination. The three overhead wheels easily rotate a full 360 degrees, allowing kids to use momentum to swing from one to the next. Although it sounds deceptively simple, the 3-Wheel Climber takes effort to master while being entertaining. This thrilling new twist on the traditional style of overhead climber adds a lot more motion and variability, making it fun and exciting rather than just strenuous exercise. The entire structure is supported by four metal support posts, which means this climber is made to stand tall for a long amount of time through bad weather and harsh use. Its steel is painted with a special powder-coat paint that counters rusting and can be colored upon request. The Freestanding 3-Wheel Overhead Swing Ladder is a great and different way to scratch a child's climbing itch.
