Footprint: 4' 2" x 8'

Use Zone: 16' 2" x 20'

COMPLIES With:

ASTM F1487-17

CPSC PUB #325

The Freestanding Double Pebble Sway Bridge is a new style of playground activity that kids are bound to love. These innovative pebble platforms are designed to sway back and forth when stepped on, making it additively challenging to step from one pebble to the next. The platforms have a slip reducing textured surface with central steel grip poles jutting out from them for children to hold onto. Kids can choose to hop from one to the next or stay on one for a ride. This model contains two rows of platforms, which offers a large number of advantages over a single row. Multiple children can use this bridge at once, even going in opposite directions. If a child just wants to enjoy swinging back and forth on a pendulum, they can do so without preventing other children from crossing. The second row of steps also allows children to move from left to right, or use both sides at once to make the trip easier.
