### COMPLIES With:

ASTM F1487-17

CPSC PUB #325

The Freestanding Curved Net Climber is a welcoming addition to any playground or backyard. Its intuitive design is just begging elementary school children to hang all over it. The curved layout allows easy scaling while providing all the climbing thrills. Kids can pretend they are hanging from a severed bridge or dangling above an active volcano. Also, children can use it as a way to make friends by racing others to the top or having hanging competitions. The limits of the Freestanding Curved Net Climber are in the limits of the imagination. This climber is easy to install and takes up little space. The sturdy steel posts keep the nylon netting in place and mitigate damage from harsh winds and constant use; making this structure stand the test of time. This curved net is ready to captivate kids who are seeking thrills.
