**Fall Height:** 36"

**Use Zone:** 25' 2" x 26' 7"

### COMPLIES With:

ASTM F1487-17

CPSC PUB #325

### ADA Compliant

The Alpha Beta Gamma Play Structure is a ton of fun in a humble package. This is the perfect system for preschool-aged kids. It is low to the ground and less intimidating than other play structures helping to promote a healthy curiosity and need for exploration. Kids can start a band with the ground-level Bongo and Single Drum attachments. These allow rhythmic improvisation and experimentation. The second level has even more goodies with two slides to choose from; the Straight Slide and the Right Turn Slide. The two slides keep up with the diverse fun already found in the structure, but there is still more for children to discover. The Gear Panel and Tic Tac Toe Panel provide children a brush with science as the gears turn and the Tic Tac Toe pieces spin. Designed to engage children in learning through play, it also provides a chance for them to catch their breath so they can continue with more tiring play a little later on. Sometimes good things do come in small packages, the Alpha Beta Gamma Play Structure is proof of that.
