COMPLIES With:

ASTM F1487-17
CPSC PUB #325

There is nothing like spending quality time with family and this 2 Seat Bucket Swing Seat Package gives families an opportunity to do just that. The buckets, meant for children six months to five years old, introduce children to the thrills of the playground at an early age and always provide a lot of fun. Bucket seats provide a safe alternative to traditional swings. They help keep a child in the seat and upright. Especially those who do not yet have the strength to stay in the seat themselves. The kit includes everything needed to get your kid soaring; four clevises, two seats, one wrench and four steel chain pieces. It is also available in seven and eight rail heights. This product is available for quick shipping in one to two weeks and its durable construction should provide years of fun for many children.
