

Swing Hanger with Shackle Pendulum

MSRP \$28.00

SALE \$19.00

Highlights:

- Easy to set up and provides maximum support
- Tamper-proof hardware using a special [Allen Wrench](#)
- Hardware makes it easy to attach chain without tedious pliers
- Bolts to connect clamp thread into nylon-insert lock nuts that resist turning over time

COMPLIES With:

ASTM F1487-17

CPSC PUB #325

This Swing Hanger with Shackle Pendulum is an important swing set component which connects the chain to the top-rail. This part can be used on a new swing set or to replace an aging or damaged part on an existing set. This model uses steel incredibly efficiently, which makes it one of the most lightweight and affordable swing hangers on the market without sacrificing structural integrity or ease of movement. Another important feature of this design is its use of a shackle pendulum, which allows it to connect to the swing's chain without requiring the use of an S hook, like most swing hangers do. The top and bottom halves of the hanger are bolted together on either side of the top-rail, which makes installation easy and ensures that it will fit tightly and securely.
