Use Zone: No use zone required

The Piper is a newer version of the Freenotes Imbarimba with a reduced size and price tag, but increased durability and the same professionally tuned sound quality. Its compact frame and simple design make it an ideal way for developing young musicians to learn or just have fun making sounds. This model features eleven fiberglass keys in a C Major pentatonic scale, which produce a different but complementary sound to that of the other Freenotes instruments with metallic keys. Its 26.5" wide frame is supported by dual recycled plastic posts which can be adjusted to your desired height to suit aspiring musicians of any age or ability. It is played using a set of two plastic mallets which are fastened to the bottom of the frame with coated steel cables to keep them attached. The Piper can be purchased individually or as part of the Weenotes Ensemble package with the Merry and Griffin.
