Use Zone: 20' 11" x 25' 10"

COMPLIES With:

ASTM F1487-17

CPSC PUB #325

ADA Compliant

The Skyline Club Play System is a simple play structure with a wide array of exciting features. The central deck of the structure is a 48-inch high platform which kids can reach via either the Transfer Station or the Pixel Climber. From there, they have access to both the rotating Ball Maze Panel, and of course, the Left Turn Slide. The slide conveniently ends angled near the stairs for a safe landing, so that children will be able to immediately climb back up to slide down again. There is also a Rain Wheel included on one of the support posts for a aurally stimulating activity. The structure maximizes safety by including handrails and high barriers along all of its ledges. It uses rotational molded plastic and steel for all its major components, making the Skyline Club Play System durable. With this many built-in activities, kids will never run out of ways to enjoy the Skyline Club Play System.
