Age Group: 5 to 12 years

Footprint: 1' x 8'

Use Zone: 13' x 20'

The NatureROCKS 8-Foot Fallen Tree Balance Beam gives children an exiting and highly decorative obstacle to practice balancing on. Its clever design looks exactly like a fallen tree, which gives it a very natural feel. The end of the beam with the tree stump is slightly wider and higher than the other side, which increases the level of difficulty as well as the resemblance to an actual tree. It is finished with incredibly realistic wood and bark details. The rugged surface of the bark also gives the balance beam some traction to help kids' shoes to grip it. It is made from glass fiber reinforced concrete, which is more than sufficiently sturdy to support children walking across its impressive 8' length without risk of it cracking. The maximum height of the structure is 16", which makes it suitable for children aged 5 - 12 to use when installed with the proper safety surfacing.
