COMPLIES With:

ASTM F1487-17

CPSC PUB #325

Add a little bit of daring to your playground with this 3-feet Double Free Standing Slide. This slide is a good height for kiddos who may want to join the fun, but are too afraid to ride down some of the taller slides. A child's security is doubled with the companion slide to have a friend take the plunge with them! An additional benefit is that it takes half the time for children to get a turn going down the slide. Children can walk up to the slide via the stairs which have a wide entrance allowing for kids to line up for each slide individually. The stairs are made of a perforated metal that allows both air to flow through, preventing it from overheating and liquids to shift through preventing standing water and possible rust over time. The slide is made of a smooth and sturdy rotationally molded plastic that will reduce friction and create a fun ride.
