COMPLIES With:

ASTM F1487-17

CPSC PUB #325

Ride the waves even when you aren't at the beach with the 4-foot Double Wave Free Standing Slide. This slide's 4-foot height is fun for kids, whether short or tall, and is a much needed piece in your playground. This structure is ideal for preschool and grade school aged kids. Kids will line up to get on this slide but can take turns racing down it, seeing who can get to the bottom faster. Because this is a wave slide they will not gain as much speed as they go down, the waves serving as an added safety precaution. This slide is made of rotationally molded plastic, which makes it a sturdy piece that will handle the many children that will want to slide down again and again. The slide is supported by strong galvanized metal posts and metal perforated stairs. This is a customizable slide allowing you to pick a breezy tropical theme or colors fit for the next speedboat. Any colors that you choose will be sure to bring even more joy to your playground goers.
