

Adirondack Clearwater Chair

MSRP ~~\$584.00~~

SALE \$514.00

Highlights:

- Recycled materials save plastic and trees
- Corrosion-proof stainless steel fasteners
- Resilient to UV ray color bleaching
- Sits higher than most chairs

The Adirondack Clearwater Chair blends modern materials and convenience with the traditional Adirondack style. Its slanted seat and contoured back provide all the encouragement you could ever need to sit back and relax, although the built-in footrest does not hurt either. The seat is also elevated fairly high off the ground so that users can see over tall tables and railings or just get a better view of the scenery around them. This chair is a great place to sit while enjoying a good book or drink, and the broad armrests give you a convenient place to set either down when you don't want to hold it anymore. This is truly a chair for all seasons, made with a UV resistant finish for the good weather and highly durable recycled plastic Resinwood for the bad. Blue, white, and cedar color options are offered, so you can select the chair that best matches your personal tastes and outdoor area.

Add even more comfort with the Adirondack Ottoman.
