

Plaza Chair

MSRP \$1,245.00

SALE \$1,096.00

Highlights:

- Relaxing ergonomic shape
- Visually interesting flat legs
- Constructed from recycled plastic
- Weather resistant - no cracking, warping or splintering

The Plaza Chair Has a sturdy design with a seat and back each comprised of four recycled plastic Resinwood boards. The frame is made from highly durable steel with a silver powder-coat. Despite its tough materials, its contoured shape and convenient armrests make it quite comfortable. Its design is very similar to the Plaza Bench, but with a width better suited for a single individual. Although the chair comes ready to mount with all the hardware you need, mounting is not required. At 106 pounds these chairs are light enough to move around, but heavy enough that they won't get moved too far. A few chairs can be placed around a Plaza table so that everyone can pull up a seat. Each of the Plaza outdoor furniture items look great together. This way you can match them with each other, as well as with their surroundings.
