

Plaza Receptacle

MSRP \$1,245.00

SALE \$1,096.00

Highlights:

- Square trash opening in the top
- All edges are reinforced with metal
- Stainless steel hardware is included
- Can function as a trash or recycling bin

The Plaza Receptacle is one of the most sturdy and stylish outdoor waste disposal containers available. Its four walls each contain five 1" x 4" slats of recycled plastic Resinwood housed in a heavy duty steel frame with a lustrous silver powder coating. Its 32-gallon capacity means that it will not need to be emptied too frequently, and the Resinwood is almost entirely maintenance-free as well. Unlike real wood, Frog Furnishings' recycled plastic is immune to rot and sun damage. Also, it doesn't bond with most kinds of paint, so graffiti can easily be sandpapered right off. It comes with a heavy lid to keep rain and wildlife from getting in, or smells from getting out. A strong cable is also included for the purpose of securing the lid to the frame of the structure. This package also includes a mounting kit to facilitate easy surface mounting installation. The Plaza Receptacle looks great alongside any other model of outdoor furniture from the Plaza product line.
