

Dero Hoop Rack - 2 Bike Capacity

MSRP \$170.00

SALE \$150.00

Highlights:

- Minimalist style bike rack
- Gives 2 points of contact
- Manufactured from recycled steel
- Simple, sleek, and affordable parking option

Unit Size: 1-9/10" x 24" x 35"

The Dero Hoop Rack has a familiar shape that every experienced or inexperienced cyclist will immediately recognize. It offers two secure points of contact that bikes can be attached to, and it is compatible with U-locks. A single U rack can accommodate two bikes, with one parked on either side of it. Multiple racks can of course be easily installed next to it to expand your capacity. Unlike many higher-capacity bike racks, this setup leaves empty space between each inverted 'U' shape, so there is more room for bikes, and the front wheel doesn't have to be lifted up and over a bar. We offer convenient surface mounts which make it easy to install on concrete and most other solid surfaces. It is made from 97% recycled metals, with a galvanized zinc finish. The bare zinc looks good on its own, but there are also many vibrant color options of powder coat paint available.

The Circle Style Bike Rack offers the same great benefits with a more robust styling.
