- Simple design won't detract from its surroundings

Unit Size: 1-1/2" x 30" x 36"

The inclusion of bike racks outside of any establishment or business is an inexpensive way to increase its accessibility and encourage healthy and sustainable modes of transportation. Dero products like this Swerve Bike Rack make high quality biking infrastructure more affordable than ever. Each of these items was designed by talented individuals who understand bikes, which is why they are U-lock compatible and offer multiple points of contact for securing bikes to. Each individual rack can accommodate two bicycles, and multiple racks can be installed alongside each other to meet any capacity needs. Built-in surface mounts make this structure easy to install on concrete and a range of other surfaces. It is composed of 97% recycled materials with a galvanized finish to prevent rust or corrosion. There are eight exciting options of powder coat paint available for you to order, although the galvanized zinc coating looks fine without any paint.

A slightly more uniformly shaped version is available as our Staple Style Bike Rack.
