- Sticker on front has QR code that links to a bike repair site
- Can be used to fix deflated tires and other bike-related issues

Unit Size: 12-3/4" x 20" x 59"

No matter what bicycle-related problem someone is having, Dero's Fixit Plus with Air Kit Prime Bike Repair Station most likely contains the solution. Its impressive collection of tools includes two Philips and flat head screwdrivers, 2.5, 3, 4, 5, 6, and 8mm Allen wrenches, 8, 9, 10, 11, 15, and 32mm box wrenches, one T25 Torx wrench, and two tire levers—all tethered to the station's frame with braided stainless steel aircraft cables which are strong enough to prevent tampering but long enough to have no problem conveniently reaching wherever the tools are needed. But this is more than just a glorified toolbox. The Fixit station also has a pair of overhead hanger arms which suspend the bicycle at eye level to make the problem area easily visible and accessible. Bikes can be hung up by either wheel, or by the seat to allow the pedals and tires to spin while being worked on. This version also comes with a built-in Air Kit Prime bike pump for re-inflating flat tires. This kit comes with a powder coat paint finish, and is available in a wide range of color options.
