

Bike Bike Rack, Bicycle-Shaped - 4 Bike Capacity

MSRP \$834.00

SALE \$736.00

Highlights:

- Attractive bicycle shape
- Provides multiple ways to lock bikes
- In-ground and surface mounting available
- Metal components are 97% recycled steel

The Bike Bike Rack is both a secure and functional storage and a striking installment of street art. When cyclists see this structure, they will appreciate the display and immediately recognize it as a safe place to park. The frame is made from majority recycled steel tubes which undergoes hot dipped zinc galvanization to fortify it and protect it against rust. Although it is the size and shape of a single standard bicycle, this rack has a capacity of four bikes. This is because one bike can be parked on each side of the rack's two 'tires' while still being well-supported with at least two points of contact. The shape allows for the usage of U-Locks, as well as any other type of common bike lock. Both in-ground and surface mounting options are available for this model, meaning it can easily be installed anywhere. Numerous color choices are available for an optional baked-on powder coat of paint, or it can be left with a bare galvanized finish.
