

Ultra Space Saver Bike Rack - U-Lock Compatible - 1 Bike Capacity

MSRP \$141.00

SALE \$125.00

Highlights:

- Most bike locks work on it
- Stores a bike vertically to save space
- Square shape makes it tamper-resistant
- Comes standard with powder coat black paint finish

The Ultra Space saver is a highly compact and secure rack for mounting a single bike vertically on a wall. It features a large curving metal bar which provides a place to lock the bike to, and distributes its weight across the wall to prevent strain on the mounting anchors. This galvanized steel bar is built to be incredibly sturdy and tamper proof, meaning this rack is safe enough to be confidently used even in public areas. At the top of this bar there is a peg which hooks through the front wheel of the bike to hold it up. This peg has a rubber coating to prevent any scratches, and is set in such a way that no weight is put on the spokes of the wheel. Installing the Ultra Space Saver is as simple as drilling four mounting anchors into a wall stud, and it is compatible with nearly any type of wall. This model is especially useful for filling small corners or spaces in storage areas which would otherwise be difficult to use efficiently.
