Age Group: 5 to 12 years

Footprint: 18' 8" x 20' 4"

Use Zone: 30' 8" x 32' 4"

The 4-Sided Spider Pyramid Net Climber 4-4 is a unique climbing structure which uses strong synthetic ropes to create a climbing environment unlike any other. The ropes are flexible enough to allow some movement, but are taut enough that the climber retains its shape. They are irregularly placed (not in a straight grid) to make the steps varied and unpredictable for a more interesting climbing experience. The spaces between them are large enough that children can climb all throughout the inside of the nets without fear of getting stuck. One clever aspect of the pyramid shape is that children will always be supported. No matter how high up they climb, they will always have a safety net beneath them. The ropes connect to the ground with four separate fasteners, making it both extremely sturdy and extremely easy to install. There is a protective coating surrounding each rope which can be customized with a variety of different color options. The structure has a sturdy galvanized steel center post which can be powder coated for a slight upcharge.
