Footprint: 28' 8" x 28' 8"

Use Zone: 40' 8" x 40' 8"

The 4-Sided Spider Pyramid Net Climber 6-4 is a larger version of the 4-4 model. It is guaranteed to stand out on any playground, both because of its unique shape and materials, as well as its impressive 244" install height. The netting is made from synthetic ropes, which are safer than metal climbing bars because of their softness and flexibility. However, the pyramid is still strong enough to handle large crowds of youngsters at once without losing its shape. A benefit of this particular shape is that there are no high places that children can climb to without having a protective safety net beneath them. The netting does not use any knots, which makes it significantly stronger, and more comfortable for children to grip and lean against. The anchoring points at each of the four corners make the pyramid sturdy as well as simple to install.
