Age Group: 5 to 12 years

Footprint: 37' 1" x 32' 2"

Use Zone: 49' 1" x 44' 2"

The 6-Sided Spider Pyramid Net Climber 6-6 is a large playground structure which is perfect for giving groups of kids an exciting and unconventional area to climb. The spaces between the ropes are large and irregular, offering children plenty of passages as they navigate throughout the whole structure. And since the climber is pyramid shaped, children will always be well supported as they climb, with nets beneath them. The flexibility of the synthetic ropes which make up the netting allow them to be moved slightly, and prevents children from getting stuck in the web. The high-quality net does not use any knots, which would potentially be structural weak points and uncomfortable for the children climbing on them. The net is fastened to the ground by six anchoring points, which spreads it out over a wide hexagonal area for a secure and stable connection. There are even three rubber platforms along the central support post which children can sit on.
