Age Group: 5 to 12 years

Footprint: 39' 8" x 45' 11"

Use Zone: 51' 8" x 57' 11"

The 6-Sided Spider Pyramid Net Climber 8-6 is our largest model of pyramid net climber with an impressive height of 327 inches at its peak. The net, supported by a galvanized steel pole, is spread over a wide area at its base by six separate anchoring points. This area forms its definitive pyramid shape, which helps to make the structure especially safe for climbing. The netting is incredibly rugged, so that the structure retains its shape even when covered with kids. However, it is still remarkably soft and flexible, making it much safer and more comfortable than metal bars. Unlike traditional square netting, this structure has a 3-dimensional design which allows children to crawl through the spaces in the netting and move in any direction. Since every part of the structure can be climbed, large groups of eager children can flock to it at once without having to wait for their turn.
