Age Group: 5 to 12 years

Footprint: 13' 2" x 13' 2"

Use Zone: 25' 2" x 25' 2"

The Bird's Nest Tree Chimney Net Climber is a complete play system made mostly of nets and ropes. The nets and platforms hanging down from the 8 overhead beams offer plenty of places for children to climb, jump, or swing to. These beams give the structure a prominent appearance which is accentuated by the flag on top. The pinnacle of the central galvanized steel post is 200 inches above the ground after installation, but the actual climbing areas only extend about halfway up, placing them at a height which is perfectly safe for any school-aged children. There are so many ropes, loops, and climbing ladders within the structure that it is hard to see them all in the pictures, but kids will spend hours discovering them all. The suspended nest platforms are excellent places for them to sit and relax for a moment before they keep on climbing.
