Age Group: 5 to 12 years

Footprint: 26' 3" x 26' 3"

Use Zone: 38' 3" x 38' 3"

The 4-Sided Super Net Climber 1 is a new style of climber which replaces the rigid metal bars of a traditional jungle gym with flexible synthetic ropes flowing out from a galvanized steel post. The ropes provide a more fluid and interesting climbing surface, and are much safer. The irregular slanted patterns of the climbing nets also add to the challenge, and the large spaces between them allow children to slip through them to get to the other side. The 4-Sided Super Net Climber is like that of our pyramid net climbers, except that it does not curve outwards at the base, and has an empty space in the middle so that children can play under it like a tent, or climb upside-down on the underside of the nets. Each of the nets on the four sides is a different color, giving the structure a bright and friendly appearance which will be welcome on any playground.
