Age Group: 5 to 12 years

Footprint: 13' 1" x 13' 1"

Use Zone: 25' 1" x 25' 1"

The Round Super Net Climber 2 combines the best qualities of a net climber, jungle gym, and teepee into one exciting playground structure. The simple, conical shape is formed by 16 synthetic ropes which extend outwards from the top of the 148-inch central galvanized steel support post and are securely anchored to the ground. These are all connected by rope rings which form the horizontal climbing rungs of the structure. Rather than knots, the ropes are fastened together with sturdy plastic connectors. The spaces between them are large enough to work as excellent footholds, and large enough for kids to slip through them to get from one side to the other. The inside of the structure is mostly hollow to allow space for kids to move around, but there is also a 'platform' of ropes bisecting it, which children can play either on top of or beneath. This platform even has two types of climbing ropes leading up to it, so that children can easily reach.
