ASTM F1487-17

CPSC PUB #325

The Octopit is the ultimate venue for the phenomenon sweeping schoolyards and recreation centers across the country. Octoball (or Gaga Ball) is an evolution of dodgeball that throws players into an octagonal pit. Players push a ball toward one another and if a player gets hit below the knees, they're out! It's safe, all-inclusive, and a great source of exercise.

What makes the Octopit so great is its wide application and easy installation. While, there are permanent installation options, the portable Octopit is also available. It takes 20 minutes to set up and 10 minutes to take down and it can go on any solid surface: concrete, asphalt, tile floors, you name it! Waterproof material enables both indoor and outdoor fun for elementary age kids and older. The Octopit is regulation size: 22 feet in diameter and 30 inches high. Each side is reinforced by three side rails, supporting lightweight polyvinyl for limited impact exposure. Purchase an Octopit and join the fun today!
