

MyTCoat Expanded Metal Park Bench without Back

MSRP \$356.00

SALE \$303.00

Highlights:

- Reinforcement under the length of the bench seat
- Round steel posts contrasts with the expanded steel
- Simple, uncluttered design that will not take away from its surroundings

The Expanded Metal Park Bench without Back is a simple and sturdy metal bench that has a robust design that makes it perfect for outdoor conditions. It has two thick steel legs to support the seat and keep it level. These bases can be bolted onto concrete walkways with surface mounting hardware, implanted into dirt or asphalt with in-ground mounting, or bought as a portable mount that sits on top of the ground to allow the bench to be moved around freely. The lightweight design of this backless bench makes it particularly easy to transport anywhere. The seat is made from steel weave laid out as a diamond-shaped lattice that helps make the unit even lighter while ensuring that this commercial-grade outdoor furniture stays dry even in rainy weather. The MyTCoat Expanded Metal Park Bench without Back is available with a large palette of color options to choose from.
