

MyTCoat Expanded Metal Rolled Edge Bench with Back

MSRP \$755.00

SALE \$642.00

Highlights:

- Expanded steel seat and back
- Coated to extend its lifetime in the elements
- Two support points that include back support
- Smoothly rolled edges for a comfortable seat

The MyTCoat Expanded Metal Rolled Edge Bench with Back is an outdoor park bench that is designed with rolled edges that give it a subtle look. This not only makes it look great but also makes it more comfortable for the legs of people using it. The seat and back are made from a durable weave of reinforced steel which is durable yet lightweight. This is especially helpful if the bench is given a portable base, which allows it to be transported wherever it is needed and stored when not in use. For permanent mounting options, we also offer in-ground mounts and surface mounts, allowing this versatile bench to be installed anywhere. The seat has an extra-wide back positioned at a slight incline to make it highly comfortable, even when rested on for long periods of time. The MyTCoat Expanded Metal Rolled Edge Bench with Back is available in an extensive selection of color options. Talk to a sales associate for more information.
