

MyTCoat Expanded Metal Rolled Edge Bench without Back

MSRP \$457.00

SALE \$389.00

Highlights:

- Weather resistant thermoplastic coating
- Edges of the expanded steel welded to create a smooth edge
- Sturdy posts on either end with additional interior bench support
- Standard 2-3/8-inch powder coated galvanized steel tubing supports

Take a load off and set down your bags on the MyTCoat Expanded Metal Rolled Edge Bench without Back. The backless design allows for larger objects to be set on the bench without the restriction of the back. That means a purse can be set down by a person or an exhausted shopper could use the bench to place their shopping bags. Additionally, this allows for comfortable seating as visitors can sit on either side of the bench. The rolled edge wraps under the bench to create a comfortable surface to set your legs as it lacks harsh angles that can poke or leave marks after a long, hot day outside. The expanded metal surface stays cooler than solid metal surfaces as the air weaves through the perforations. The surface is protected by MyTCoat's signature coating that will help it survive whatever the public and weather throw at it.
