

MyTCoat Honeycomb Steel Pipe Frame Bench without Back

MSRP \$1,238.00

SALE \$1,053.00

Highlights:

- Rolled edge for a clean finish
- Armrests on either end of the bench
- Can be used indoors or outdoors
- Powder and thermoplastic coat finishes add durability

The Honeycomb Steel Pipe Frame Bench without Back is a stylish bench with rounded details that make it look friendly and inviting. The arms and legs of the bench are combined, made from the same two metal arches that spring up from the ground. These pieces are easy to install and simply have to be bolted on top of the ground with the surface mounting option or bored into it and cemented in place with our in-ground mounting. The seat of the bench is made from a highly durable sheet of commercial-grade steel that has a repeating pattern of circular holes cut into it. These holes add to the overall rounded appearance of the structure while also making it more comfortable and allow water to drain to prevent rain from collecting on top of it. The bench is treated with a special coating that defends the metal components against scratching, rust, and excessive temperatures.
