

MyTCoat Ribbed Steel Pipe Frame Bench without Back

MSRP \$1,249.00

SALE \$1,062.00

Highlights:

- Set low to give spaces an open feeling
- Cheerfully curved supports double as armrests
- Supports are powder-coated steel and the slats are thermoplastic coated for a durable bench

The Ribbed Steel Pipe Frame Bench without Back is the perfect option for any outdoor location that needs compact and convenient seating options. This bench has a unique design that seamlessly blends the arms and legs together into a single arch that extends upwards from the ground. This cleverly makes the structure of the bench much stronger, since it has fewer individual parts. The seat of the bench is suspended between these two arches and has a rolled shape to make it better looking and more comfortable to sit on. The backless design makes the bench compact and easy to see over and step over so that it is handy without ever getting in the way. This also makes both sides accessible, so that it is easier to use from all angles. The bench can be mounted in-ground or to your concrete area via a surface mount to firmly position it in place. Coated in a thermoplastic paint, the slats are ultra-durable. Ask a sales representative for more information.
