

MyTCoat 32 Gallon Ribbed Steel Trash Receptacle

MSRP \$778.00

SALE \$661.00

Highlights:

- Tough coating stands up well against the weather
- Choose from multiple color options with each coating
- Combines vertical slat pattern with a gentle curve for visual interest
- Lid, plastic liner and mount for receptacle must be purchased separately

The MyTCoat 32 Gallon Ribbed Steel Trash Receptacle is one of our strongest models available, offering some of the best protection for the 32 Gallon Plastic Liner (sold separately) and any trash bag you place inside. It has a tight pattern of vertical metal "ribs" that is criss-crossed by wavy horizontal bands. The pattern attracts the eye while also providing a tough shell that keeps trash from spilling out. The durable metal can withstand large amounts of force from potential vandals and the elements. The metal is coated with either Industrial Standard or Advantage coating to protect the metal against scratching, overheating, and corrosion from rust. The Ribbed Steel Trash Receptacle is even more effective when you add one of several compatible MyTCoat trash can lids.
