- Floating central T-shaped post for the tabletop
- Maximizes individual tabletop space with 46" size
- Expanded steel top and seats are smoothly edged
- Umbrella port in the center for adding extra shade

The MyTCoat Expanded Metal Deluxe Frame Square Table has an extremely robust and stylish design that makes it an excellent option for any outdoor park, dining area, or recreation spot. Each of its four individual seats is supported by a resilient vertical column made of galvanized steel, which is then bolted to a large square pedestal undergirding the middle of the table. Both the table and seat are made of flattened expanded metal that ensures its durability and longevity. This makes all aspects of the framework independently strong and sturdy. These seats will not be tilting or wobbling!. Each of these seats is wide enough for two people to sit on, giving the four-seat version of the table the capacity to seat eight people. The seats and tabletop are made from durable steel in a repeating diamond pattern, which is coated in a layer of protective thermoplastic. This layer shields the metal against corrosion, overheating, and scratching, and gives it a delightful color and texture.
