MyTCoat's 32 Gallon Ribbed Steel Funnel-Top Trash Receptacle is an attractively designed waste bin that can be placed in any number of exterior and interior locations. Whether you're a hotel manager or a parks department planner, nobody wants to see piles of garbage start to accumulate around their site. The handsome vertical slatted steel construction of the receptacle is sure to attract visitors who will not only properly dispose of their trash while admiring the beauty of the receptacle. This waste disposal is tough and durable being made of 11 gauge strap metal. The exterior can be finished with either a powder coat paint application, an industry standard polyethylene coating, or MyTCoat's unique Advantage polyethylene coating. This trash bin is also purchasable with one of several different lid models. Choose the option that will complete your space along with the elegant design of the trash receptacle.
