

## MyTCoat Two Hoop Puppy Jump

**MSRP \$577.00**

**SALE \$491.00**

### Highlights:

- Two welded together offset hoops
- Solid steel coated in MyTCoat Industry Standard Coat
- Provides two different jumping heights in one product
- Sturdy in-ground mounting to withstand the wear of dogs jumping daily

---

Your dog can leap into action with this Two Hoop Puppy Jump. This obstacle contains a double set of hoops suspended above the ground at different heights. This lets them offer different levels of agility challenge for dogs to complete. Teaching a dog to jump through one of the hoops head-on is impressive, but teaching a dog to weave back and forth through the hoops is a real test of training skill. The hoops' considerable width allows almost any dog to fit through them, and few dogs should have trouble reaching the more elevated hoop either. The solid steel rings have a 5/8-inch diameter, making them resistant to damage, even if a large dog fails to clear the jump. The unit features an in-ground mount to position it in place, creating a durable activity that dogs will play with for years to come.
